CalAIM Recuperative Care/Short-Term Post Hospitalization
Referral/Authorization Request

Instructions:
Please complete this form and attach the following documents: Plan of Care, Discharge Plan, PT/OT notes and H&P. Authorization may be denied if this information is not provided.

Step 1: Complete all information below.

Referral Information

Referral date: 10/14/2026 Referred by: Monica Alvarez, MSW

Agency or relationship to member: Harbor Vista Medical center - case Mgmt

Referring provider National Provider Identifier (NPI) (if applicable): 1588012346

Phone: 714-555-0142 Fax: 714-555-0199 Email: malvarez@harborvista.test

Member Information

Member name: Gerald Whitfield CalOptima Health ID: 91827364A

Date of birth: 03/22/1963 Member's preferred language: English

Phone: 714-555-0187 Email: N/A

Is the member currently in hospital? ☒ Yes ☐ No

Last visit to PCP: 06/2026 Next PCP visit: _____

Primary Care Provider (PCP) Information

Name: Lena Haddad, MD

Phone: 714-555-0163 Address: 1120 W Warner Ave, Santa Ana, CA 92707

Step 2: Check the boxes for the Community Supports the member is interested in receiving. The following pages provide additional eligibility information about Community Supports.

Step 3: Please check off the most appropriate Recuperative Care/Short-Term Post-Hospitalization Housing pathways based on the eligibility listed in the following pages.

Please note that members may not receive more than a combined 182 days of Short-Term Post-Hospitalization, Recuperative Care and Transitional Rent during any rolling 12-month period.

	Pathway	Description	Eligibility
☒	Recuperative Care only	Short-term residential care for individuals who no longer require hospitalization but will need to heal from an injury, illness or mental health condition.	Both must apply: Homeless or at risk of homelessness Member requires recovery in order to heal from an injury or illness.
☐	Short-Term Post-Hospitalization Housing only	Assists members with high medical or behavioral health needs with short-term housing after leaving the hospital, recovery facility, recuperative care or other facility.	Member must meet the following criteria: (1) Member is exiting an institution, which includes recuperative care facilities, inpatient hospitals, residential substance use disorder or mental health treatment facilities, correctional facilities or nursing facilities. AND (2) Member is experiencing homelessness. AND (3) Member meets one the following criteria: a. Is receiving ECM b. Have one or more serious chronic conditions c. Have a serious mental illness; or d. Is at risk of institutionalization. AND (4) Member is having ongoing physical and behavioral health needs as determined by a qualified health professional.
☐	Nursing Facility with plans to transition to Recuperative Care	Short-term residential care for individuals who no longer require hospitalization but still need to heal from an injury or illness or a mental health condition.	Select one that applies: Homeless or at risk of homelessness Member who is at risk of hospitalization or at post-hospitalization Members who live alone with no formal supports.

☐	Recuperative Care with plans to transition to Short-Term Post-Hospitalization Housing	Short-term residential care for individuals who no longer require hospitalization but still need to heal from an injury, illness or mental health condition.	Select one that applies: Homeless or at risk of homelessness Individuals who are at risk of hospitalization or at post-hospitalization OR Individuals who live alone with no formal supports AND Member is exiting recuperative care, inpatient hospital, residential substance use disorder treatment facility, residential mental health treatment facility, correctional facility or nursing facility.

Admitting Diagnosis

Qualifying Recuperative Care/Short-Term Post-Hospitalization Housing diagnosis:

Kerion, anemia, hypertension

ED visit/hospital admit date: 10/10/2026 Expected discharge date: 10/15/2026

Will the member need any specialist follow-up care? ☑ Yes ☐ No

INPATIENT WOUND and OSTOMY PROGRESS NOTE

S - Subjective:

Per H&P- 63 years old male presenting with scalp infection not improving. He specifically presented with occipital swelling and tenderness. He was seen at Westside Urgent Care a week ago and diagnosed with a Kerion and prescribed an antifungal. Patient states he hit the back of his head 3 days ago worsening the pain-- it may have been a syncopal episode.

O - Objective:

Patient awake, alert, pleasant, and agreeable to wound care
Wound culture: Growing Staphylococcus aureus
Imaging: CT of Neck with Contrast- Edema is identified in the subcutaneous tissues of the right suboccipital scalp, extending to the right upper neck. There is prominence of some of the fascia. No focal fluid collection or mass is seen.
Allergies: NKA

A - Assessment:

Wound Location: RIGHT OCCIPITAL SCALP
Measurements: 1 X 1 X 0.5 cm
Undermining: 0.3 cm circumferential
Tunneling: None
Wound bed: Red, moist
Periwound: pink
Drainage: moderate purulent amount
Wound care: Cleansed with wound cleanser, Therahoney applied to wound bed, lightly packed with 1/4" Iodoform packing strip, covered with foam bordered dressing.
The patient tolerated well.

P - Plan:

Continue daily wound care: Cleanse with wound cleanser, apply Therahoney to wound bed, lightly pack the wound cavity with 1/4" Iodoform packing strip, cover with foam bordered dressing. The wound care team will sign off; nurse to continue dressing changes. The wound care team remains available for support.

Consults
Infectious Diseases consult ordered by Priya Raman, MD

Patient:	Gerald Whitfield
Medical Record Number:	70418823
Date of birth:	03/22/1963
Date of admission:	10/10/2026
Date of service:	10/11/2026
Admitting Provider:	Priya Raman, MD
Requesting/Referring	Internal Medicine

Reason for Consultation:
I was asked to see the patient for antibiotic recommendations

Chief Complaint
Scalp lesion

History of Present Illness
Patient presented to the ER with a scalp lesion going on for 2 years also was noted to be anemic-patient states something heavy was thrown on his head 2 years ago when he was staying at a shelter in Anaheim. Since he's had these lesions he's seen two dermatologists-it does not look like any skin biopsies were done but we do not have any results-patient states that neither of the dermatologist's were able to diagnose what is going on-he went to Westside Urgent Care and was told he had tenia capitis infection. He does not seem to have been on any antifungal therapy. Denies fevers or chills but he's complaining of drainage from the scalp.

Microbiology:
Microbiology Results (last 30 days)
- Wound Culture, scalp (10/10/2026): Staphylococcus aureus, MSSA - Cefazolin S, Clindamycin S, Doxycycline S
- Blood Culture x2 (10/10/2026): No growth at 72 hours
- Fungal culture, scalp: pending

Anti-microbials:

CT Head WO/W Contrast
Result Date: 10/10/2026
Mild atrophy with chronic changes of the brain. No acute intracranial process. Soft tissue edema. Cellulitis could be considered. No abscess is seen.

CT Soft Tissue Neck With Contrast
Result Date: 10/10/2026
Edema in the subcutaneous tissues of the right upper neck and lower scalp. Cellulitis could be considered. No abscess is seen. Nonspecific reactive cervical lymph nodes.

X-Ray Chest Single View
Result Date: 10/10/2026
Normal chest. No acute cardiopulmonary process.

Diagnostic Studies
Available data and images were reviewed personally. Significant results and findings are addressed here or in the Assessment and Plan.

Assessment :
-Potential tinea capitis infection of the scalp versus allergic contact dermatitis based on the history-already seen 2 dermatologists but no skin biopsy done per patient although records not available to review
-secondary bacterial cellulitis with ongoing drainage
-leukocytosis rule out from infection or from profound anemia

Plan:
-Typical scalp bacteria causing infection would be Staph aureus or strep change to IV Ancef
-patient needs to see a dermatologist as soon as possible on discharge to consider doing a skin biopsy to be 100% sure this is just a tinea infection and not something else-treatment is outpatient and I would not recommend any antifungal therapy until the diagnosis is confirmed by skin biopsy or by clinical judgment by dermatologist-since this is a non life-threatening infection from an ID point he can discharge
-on discharge recommend p.o. Keflex 500 mg every 12 hours for 1 week along with wound care and urgent referral to Dermatology
-can stop vancomycin and Zosyn
-continue wound care
-this was discussed with the patient and the nurse.

Complex antimicrobial therapy, counseling and treatment -including educating patient and family on antimicrobial resistance, mitigation and tailoring therapy options based on public Health data. Public health investigation as needed.

Thank you for allowing me to assist in the care of Gerald Whitfield. For questions or concerns, feel free to contact my service at 714-555-0100.

MRN: 70418823 DOB: 03/22/1963 (63 y.o. M) Acct: 900184227113 Adm: 10/10/2026

Mental Status - Orientation	oriented and alert
Behavioral Assessment	No issues
Physical Assessment	No issues
Suicide Attempt History	No
Current Psychiatrists Provider and Phone Number	per patient - Dr. Nguyen through county BH - will see her this week
Therapist and Phone Number	n/a
Family History of Mental Illness/Substance Abuse/Suicide	n/a
Have you experienced any neglect or abuse in the past?	Patient refuses to disclose details
Past Neglect or Abuse re-assessed at discharged	Patient refuses to disclose details
Notify Treatment Team to Assess Patient's Capacity?	No concerns at this time
Psychological Trauma History	None
Coping Skills	Other
Strengths	Verbalizes Needs and Makes them Known
Barriers	Unhoused
Substance Abuse History	Alcohol
Substance Abuse Resources	Patient will accept substance abuse resources
Stress	
Do you feel stress - tense, restless, nervous, or anxious, or unable to sleep at night because your mind is troubled all the time - these days?	Pt declined to answer
Intimate Partner Violence	
Within the last year, have you been afraid of your partner or ex-partner?	No
Within the last year, have you been humiliated or emotionally abused in other ways by your partner or ex-partner?	No
Within the last year, have you been kicked, hit, slapped, or otherwise physically hurt by your partner or ex-partner?	No
Alcohol Use	
Q1: How often do you have a drink containing alcohol?	4 or more times a week
Q2: How many drinks containing alcohol do you have on a typical day when you are drinking?	3 or 4
Q3: How often do you have six or more drinks on one occasion?	Monthly
Discharge	
Barriers to Discharge	Clinical reason
Patient Engaged in Discharge Planning	Yes
Family/Caregiver's Assessed for	Readiness, willingness, and ability to provide or support self-management activities
Patient/Family/Other Are In Agreement With Discharge Plan	Yes

WHITFIELD, GERALD A Harbor Vista Medical Center

Plan/Interventions	Resources given

SW acknowledged SS consult for homelessness.

Patient is a 63y.o. male admitted on 10/10/2026 for cellulitis of scalp, kerion of occipital region of scalp, and chest pain. Demographics confirmed. Patients address on file is his mailing address, patient is unhoused. Per patient he is mostly independent and owns a cane and blood pressure machine as DME. No HH/SNF history. The patient reports he has both depression and anxiety that is managed by medication and a psychiatrist. Patient reports it works well for him and he has an appt this coming week. Patient declined additional mental health resources. Patient reports he drinks alcohol but did not want to disclose exact amounts. Per patient, he drinks daily. SW offered substance use resources, patient accepted. SW offered community and shelter resources, patient accepted.

SW reviewed patients insurance, and offered IF RECUP referral - patient accepted. SW also offered assistance at DC to check shelters, patient in agreement. SW explained that we are not able to guarantee shelter placement at DC, patient understood.

SW to return to bedside to resources.

Pending DC orders and recommendations. DCP: community vs shelter placement.

Addendum:

1:22pm: SW dropped resources at bedside. SW confirmed patients phone number and received permission to provide his contact to Illumination Foundation.

Assessment & Plan

- **Cellulitis of scalp**

Recently Diagnosed Kerion
HTN
Anemia (Microcytic)
Obesity

--- Abx broad spectrum IV
--- Likely Antifungal as well, ID eval, monitor closely
--- for anemia, monitor h/h --- r/o GI bleed, check stool for blood, Consider transfusion and GI eval.

Chief complaint

Headache

Gerald Whitfield is a 63 years old male presenting with scalp infection not improving. He specifically presented with occipital swelling and tenderness. He was seen at Westside Urgent Care ER a week ago and diagnosed with a Kerion and prescribed an antifungal. Patient states he hit the back of his head 3 days ago worsening the pain-- it may have been a syncopal episode. Also developed left-sided chest pain while walking today, no radiation, no shortness of breath, sweats or nausea, no history of myocardial infarction. Pain has resolved. In our ER, Hb was 7.5 (baseline unknown) and wbc was 13.2. Na 134. CT Neck showed R upper neck and lower scalp cellulitis w/ no obvious abscess. He was started on IV abx.

Medical/Surgical/Social/Family History

I have reviewed and updated the patient history.

Allergies

No Known Allergies
