FROM	Jordan Kim, RN Case Manager - Case Management, Laguna Pines Medical Center
SENDER FAX	949-555-0179
TO	Illumination Foundation
FAX NUMBER	714-555-0108
DATE	10/14/2026
SUBJECT	Referral for RECUP CARE - Dolores Reyes (DOB 07/09/1959)

MESSAGE

Hello,
Please find attached referral packet for Recuperative Care. Patient has been weaned to room air and is transitioning to oral antibiotics today. PT evaluation is attached; patient ambulates with front wheel walker. Patient is Spanish speaking; daughter can assist with communication. Anticipated discharge 10/15/2026. Please call with any questions.
Thank you for your consideration,

Jordan Kim, RN Case Manager
949-555-0174 | jkim@lagunapines.test

Referral/Authorization Request

Instructions:
Please complete this form and attach the following documents: Plan of Care, Discharge Plan, PT/OT notes and H&P. Authorization may be denied if this information is not provided.

Step 1: Complete all information below.

Referral Information

Referral date: 10/14/2026 Referred by: Jordan Kim, RN Case Manager

Agency or relationship to member: Laguna Pines Medical Center - Case Mgmt

Referring provider National Provider Identifier (NPI) (if applicable): 1730045519

Phone: 949-555-0174 Fax: 949-555-0179 Email: jkim@lagunapines.test

Member Information

Member name: Dolores Reyes CalOptima Health ID: 56473829B

Date of birth: 07/09/1959 Member's preferred language: Spanish

Phone: 949-555-0126 Email: N/A

Is the member currently in hospital? ☒ Yes ☐ No

Last visit to PCP: 06/2026 Next PCP visit: _____

Primary Care Provider (PCP) Information

Name: Rafael Duarte, MD

Phone: 949-555-0181 Address: 26800 Crown Valley Pkwy, Mission Viejo, CA 92691

Step 2: Check the boxes for the Community Supports the member is interested in receiving. The following pages provide additional eligibility information about Community Supports.

Step 3: Please check off the most appropriate Recuperative Care/Short-Term Post-Hospitalization Housing pathways based on the eligibility listed in the following pages.

Please note that members may not receive more than a combined 182 days of Short-Term Post-Hospitalization, Recuperative Care and Transitional Rent during any rolling 12-month period.

	Pathway	Description	Eligibility
☒	Recuperative Care only	Short-term residential care for individuals who no longer require hospitalization but will need to heal from an injury, illness or mental health condition.	Both must apply: Homeless or at risk of homelessness Member requires recovery in order to heal from an injury or illness.
☐	Short-Term Post-Hospitalization Housing only	Assists members with high medical or behavioral health needs with short-term housing after leaving the hospital, recovery facility, recuperative care or other facility.	Member must meet the following criteria: (1) Member is exiting an institution, which includes recuperative care facilities, inpatient hospitals, residential substance use disorder or mental health treatment facilities, correctional facilities or nursing facilities. AND (2) Member is experiencing homelessness. AND (3) Member meets one the following criteria: a. Is receiving ECM b. Have one or more serious chronic conditions c. Have a serious mental illness; or d. Is at risk of institutionalization. AND (4) Member is having ongoing physical and behavioral health needs as determined by a qualified health professional.
☐	Nursing Facility with plans to transition to Recuperative Care	Short-term residential care for individuals who no longer require hospitalization but still need to heal from an injury or illness or a mental health condition.	Select one that applies: Homeless or at risk of homelessness Member who is at risk of hospitalization or at post-hospitalization Members who live alone with no formal supports.

☐ Recuperative Care with plans to transition to Short-Term Post-Hospitalization Housing	Short-term residential care for individuals who no longer require hospitalization but still need to heal from an injury, illness or mental health condition.	Select one that applies: Homeless or at risk of homelessness Individuals who are at risk of hospitalization or at post-hospitalization OR Individuals who live alone with no formal supports AND Member is exiting recuperative care, inpatient hospital, residential substance use disorder treatment facility, residential mental health treatment facility, correctional facility or nursing facility.

Admitting Diagnosis

Qualifying Recuperative Care/Short-Term Post-Hospitalization Housing diagnosis:

Pneumonia, COPD exacerbation, DM2

ED visit/hospital admit date: 10/09/2026 Expected discharge date: 10/15/2026

Will the member need any specialist follow-up care? ☑ Yes ☐ No

PHYSICAL THERAPY EVALUATION

S - Subjective:

Pt seen for PT evaluation with Spanish interpreter (iPad #40122). Pt reports she was independent without device prior to admission, walks with a cane "some days" for knee pain. Lives in her car; daughter lives in Riverside and is not able to house pt.

O - Objective:

Pt seated in chair, alert and oriented x4, on room air, SpO2 95% at rest
Bed mobility: Supervision
Sit to stand: Contact guard assist from chair, Supervision with FWW
Gait: 150 ft with front wheel walker, supervision, 1 standing rest break; SpO2 89% after ambulation, recovered to 93% within 1 min with pursed-lip breathing
Stairs: 4 steps with handrail, contact guard assist
Balance: Tinetti 19/28 - moderate fall risk

A - Assessment:

Pt presents with decreased activity tolerance, impaired balance and gait deviations secondary to pneumonia/COPD exacerbation and deconditioning. Prior level of function: independent community ambulator. Rehab potential: good. Goals (by discharge): ambulate 200 ft with FWW mod I; SpO2 >= 90% with ambulation using pursed-lip breathing; independent with home exercise program.

P - Plan:

Recommend front wheel walker for all ambulation (DME ordered). Pt safe to discharge to a supportive setting such as recuperative care; not safe to return to living in vehicle. No skilled HH PT needs if placed in recuperative care. Pt educated on energy conservation and pursed-lip breathing; verbalized understanding via interpreter.

Diagnostic Studies
Available data and images were reviewed personally. Significant results and findings are addressed here or in the Assessment and Plan.

Assessment :
-Acute exacerbation of COPD triggered by community acquired pneumonia, improving
-Acute hypoxic respiratory failure, resolved - room air at rest, borderline with exertion
-Medication access barrier: no maintenance inhalers x2 weeks

Plan:
-complete prednisone 40 mg x 5 days, no taper needed
-transition to cefpodoxime 200 mg PO BID to complete 7 days total antibiotics (PCN allergy - rash only, tolerating ceftriaxone)
-resume tiotropium + budesonide-formoterol; meds to beds prior to discharge with spacer teaching
-ambulatory O2 study done: does not qualify for home O2
-outpatient PFTs and pulmonary f/u 4-6 weeks
-ok for discharge from pulmonary standpoint; recuperative care strongly recommended
-this was discussed with the patient via interpreter and her daughter by phone.

Complex antimicrobial therapy, counseling and treatment -including educating patient and family on antimicrobial resistance, mitigation and tailoring therapy options based on public Health data. Public health investigation as needed.

Thank you for allowing me to assist in the care of Dolores Reyes. For questions or concerns, feel free to contact my service at 949-555-0170.

Laguna Pines Medical Center

Plan/Interventions	Resources given

SW consulted for discharge planning / housing insecurity.

Patient is a 67y.o. female admitted on 10/09/2026 for pneumonia and COPD exacerbation. Interview completed in Spanish. Patient reports she lost her apartment in Mission Viejo in August 2026 after rent increase and has been sleeping in her 2011 Honda Civic in a church parking lot. This is her first episode of homelessness. Daughter Marisol lives in Riverside in a 1-bedroom with 3 children and is unable to house pt. Pt is independent with ADLs, uses a walker per PT. No mental health history, denies alcohol or drug use.

SW reviewed insurance (CalOptima OneCare) and offered IF RECUP referral - patient and daughter in agreement. SW also provided CalOptima Housing Navigation and Coordinated Entry information. SW explained that we are not able to guarantee shelter placement at DC, patient understood.

Pending DC orders and recommendations. DCP: Recuperative care.

Addendum:
3:05pm: SW faxed referral to Illumination Foundation. Daughter Marisol (949-555-0133) given permission to be contacted regarding placement.

Inpatient History and Physical - Hospital Medicine

Assessment & Plan

- **Community acquired pneumonia, RLL**

COPD exacerbation
Acute hypoxic respiratory failure
DM2 (A1c 7.8)
HTN
Homelessness

--- Ceftriaxone + azithromycin, f/u blood/sputum cx
--- Prednisone 40 mg x5 days, scheduled nebs, wean O2
--- Hold metformin while inpatient, SSI
--- PT/OT eval, SW/CM for discharge planning.

Chief complaint
Shortness of breath

Dolores Reyes is a 67 years old female, Spanish speaking (history obtained with interpreter #40122), with COPD and type 2 diabetes who presents with 4 days of worsening shortness of breath, productive cough with yellow sputum, and subjective fevers. She has been sleeping in her car since losing her apartment in August and ran out of her inhalers 2 weeks ago. EMS found her SpO2 84% on room air, improved to 92% on 3L NC. In our ER, temp 38.4, WBC 15.8, lactate 1.6, procalcitonin 0.9. CXR with right lower lobe consolidation. She received duonebs, methylprednisolone 125 mg IV and ceftriaxone/azithromycin.

Medical/Surgical/Social/Family History
I have reviewed and updated the patient history.

Allergies
Penicillins (Rash)

Vitals:

BP	152/84
Pulse	(!) 108
Resp	(!) 26
Temp	(!) 38.4 °C (101.1 °F)
SpO2	(!) 86%

Physical Exam

General: Awake, alert, in no apparent distress.
Head: Normocephalic, atraumatic.
Respiratory: Breathing comfortably and in no respiratory distress. No audible wheezing or stridor.
Cardiovascular: Extremities are warm and well perfused.
Neuro: Awake and alert. Moving extremities.
Scattered expiratory wheezes, diminished R base.

Results Review

I have reviewed the latest lab and imaging results.

Required Daily Device Assessment:

This patient does not have a documented central line or urinary catheter.
