FAX COVER SHEET

FROM	Keisha Doyle, LCSW - Case Management, Westminster Bay Hospital
SENDER FAX	657-555-0119
TO	Illumination Foundation
FAX NUMBER	714-555-0108
DATE	10/14/2026
SUBJECT	Referral for RECUP CARE - Terrence Banks (DOB 11/30/1971)

MESSAGE

Hello,
Referral for recuperative care for patient s/p right partial 5th ray amputation. ID has transitioned patient to oral antibiotics (no PICC). Patient will need daily dressing changes; home health wound care has been ordered through Coastline Home Health and can follow patient at recuperative care. Podiatry f/u scheduled 10/21. Anticipated discharge 10/15/2026.
Thank you for your consideration,

Keisha Doyle, LCSW

CalAIM Recuperative Care/Short-Term Post Hospitalization
Referral/Authorization Request

Instructions:
Please complete this form and attach the following documents: Plan of Care, Discharge Plan, PT/OT notes and H&P. Authorization may be denied if this information is not provided.

Step 1: Complete all information below.

Referral Information

Referral date: 10/14/2026 Referred by: Keisha Doyle, LCSW

Agency or relationship to member: Westminster Bay Hospital - Case Mgmt

Referring provider National Provider Identifier (NPI) (if applicable): 1932267701

Phone: 657-555-0112 Fax: 657-555-0119 Email: kdoyle@westminsterbay.test

Member Information

Member name: Terrence Banks CalOptima Health ID: 33012984C

Date of birth: 11/30/1971 Member's preferred language: English

Phone: 657-555-0148 Email: N/A

Is the member currently in hospital? ☒ Yes ☐ No

Last visit to PCP: unknown Next PCP visit:

Primary Care Provider (PCP) Information

Name: None on file - assigned to Westminster Community Clinic

Phone: 657-555-0190 Address: 14200 Goldenwest St, Westminster, CA 92683

Step 2: Check the boxes for the Community Supports the member is interested in receiving. The following pages provide additional eligibility information about Community Supports.

Step 3: Please check off the most appropriate Recuperative Care/Short-Term Post-Hospitalization Housing pathways based on the eligibility listed in the following pages.

Please note that members may not receive more than a combined 182 days of Short-Term Post-Hospitalization, Recuperative Care and Transitional Rent during any rolling 12-month period.

	Pathway	Description	Eligibility
☒	Recuperative Care only	Short-term residential care for individuals who no longer require hospitalization but will need to heal from an injury, illness or mental health condition.	Both must apply: Homeless or at risk of homelessness Member requires recovery in order to heal from an injury or illness.
☐	Short-Term Post-Hospitalization Housing only	Assists members with high medical or behavioral health needs with short-term housing after leaving the hospital, recovery facility, recuperative care or other facility.	Member must meet the following criteria: (1) Member is exiting an institution, which includes recuperative care facilities, inpatient hospitals, residential substance use disorder or mental health treatment facilities, correctional facilities or nursing facilities. AND (2) Member is experiencing homelessness. AND (3) Member meets one the following criteria: a. Is receiving ECM b. Have one or more serious chronic conditions c. Have a serious mental illness; or d. Is at risk of institutionalization. AND (4) Member is having ongoing physical and behavioral health needs as determined by a qualified health professional.
☐	Nursing Facility with plans to transition to Recuperative Care	Short-term residential care for individuals who no longer require hospitalization but still need to heal from an injury or illness or a mental health condition.	Select one that applies: Homeless or at risk of homelessness Member who is at risk of hospitalization or at post-hospitalization Members who live alone with no formal supports.

☐	Recuperative Care with plans to transition to Short-Term Post-Hospitalization Housing	Short-term residential care for individuals who no longer require hospitalization but still need to heal from an injury, illness or mental health condition.	Select one that applies: Homeless or at risk of homelessness Individuals who are at risk of hospitalization or at post-hospitalization OR Individuals who live alone with no formal supports AND Member is exiting recuperative care, inpatient hospital, residential substance use disorder treatment facility, residential mental health treatment facility, correctional facility or nursing facility.

Admitting Diagnosis

Qualifying Recuperative Care/Short-Term Post-Hospitalization Housing diagnosis:

Osteomyelitis R foot s/p amputation, DM2 uncontrolled, post-op wound

ED visit/hospital admit date: 10/07/2026 Expected discharge date: 10/15/2026

Will the member need any specialist follow-up care? ☑ Yes ☐ No

INPATIENT WOUND and OSTOMY PROGRESS NOTE

S - Subjective:

Per H&P- 54 years old male with uncontrolled DM2 and neuropathy admitted with R foot diabetic ulcer and osteomyelitis of 5th metatarsal, now POD#4 s/p R partial 5th ray amputation by podiatry (Dr. Park) on 10/09/2026. Patient reports pain 3/10, states "I can't really feel my foot anyway."

O - Objective:

Patient awake, alert, cooperative with dressing change
Bone culture: MSSA and Streptococcus agalactiae (group B)
Pathology: acute osteomyelitis, proximal margin negative
Allergies: Sulfa (hives)

A - Assessment:

Wound Location: RIGHT LATERAL FOOT (5TH RAY AMPUTATION SITE)
Measurements: 4.0 X 1.8 X 0.6 cm
Undermining: None
Tunneling: None
Wound bed: 70% red granulation, 30% yellow fibrin
Periwound: intact, mild maceration
Drainage: small serosanguinous
Wound care: Cleansed with normal saline, skin prep to periwound, packed lightly with calcium alginate, covered with ABD and kerlix, secured with tape. Post-op shoe reapplied.
The patient tolerated well.

BANKS, TERRENCE L
MRN: WB00639127 DOB: 11/30/1971 (54 y.o. M) Acct: 220917634 Adm: 10/07/2026

P - Plan:

Daily dressing change: cleanse with NS, skin prep periwound, calcium alginate to wound bed, ABD and kerlix. Heel weight bearing only in post-op shoe with walker. Patient NOT independent with wound care (unable to visualize lateral foot) - home health RN ordered for daily dressing changes. Podiatry f/u 10/21/2026.

Assessment & Plan

- **Diabetic foot infection with osteomyelitis R 5th MT**

DM2 uncontrolled with hyperglycemia
Peripheral neuropathy
Methamphetamine use
PTSD
Homelessness

--- Vancomycin + cefepime + metronidazole IV, f/u bone cx
--- Podiatry consult for I&D vs amputation
--- Basal/bolus insulin, diabetes education, A1c
--- ID consult, SW for dc planning.

10/13: POD#4 s/p R partial 5th ray amputation, margins clean per path. Bone cx MSSA + strep agalactiae. ID switched to PO doxycycline + levofloxacin x 6 wks total. BG 120-190 on Lantus 22u. Stable for dc to recuperative care w/ HH wound care.

Interval Summary

Pt pain controlled on PO meds, ambulating heel weight bearing with walker.

Vitals:

BP	128/80
Pulse	78
Resp	16
Temp	36.7 °C (98.1 °F)
SpO2	98%

Physical Exam

General: Awake, alert, in no apparent distress.

Head: Normocephalic, atraumatic.
Respiratory: Breathing comfortably and in no respiratory distress. No audible wheezing or stridor.
Cardiovascular: Extremities are warm and well perfused.
Neuro: Awake and alert. Moving extremities.
R foot: dressing C/D/I, post-op shoe in place.

Results Review

I have reviewed the latest lab and imaging results.

Required Daily Device Assessment:

This patient does not have a documented central line or urinary catheter.

Diagnostic Studies
Available data and images were reviewed personally. Significant results and findings are addressed here or in the Assessment and Plan.

Assessment :
-Diabetic foot osteomyelitis R 5th MT s/p partial ray amputation with clean proximal margin
-Bone culture MSSA + Group B strep
-MRSA nares colonization
-Uncontrolled DM2 (A1c 11.4), homelessness, stimulant use - high risk for nonadherence

Plan:
-stop vancomycin, cefepime and metronidazole
-start doxycycline 100 mg PO BID + levofloxacin 750 mg PO daily (sulfa allergy - avoid TMP-SMX)
-total duration 3 weeks from surgery given clean margin; reassess at ID clinic 10/28
-no PICC indicated
-weekly CBC, CMP, CRP via home health
-strongly recommend recuperative care for wound healing and glycemic control
-this was discussed with the patient, podiatry and the nurse.

Complex antimicrobial therapy, counseling and treatment -including educating patient and family on antimicrobial resistance, mitigation and tailoring therapy options based on public Health data. Public health investigation as needed.

Thank you for allowing me to assist in the care of Terrence Banks. For questions or concerns, feel free to contact my service at 657-555-0110.

Assessment	
Assessment Type	Initial;Face to Face
Referral Data	
Referral Source	Nurse
Referral Name	Homeless
Referral Reason	Homeless
Patient Information	
Where was the patient admitted from?	Unhoused
Living Arrangements	Unhoused
Primary Caretaker(s)	Self
Type of Residence	Unhoused
Primary Family/Caregiver Contact Name, Number and Relationship	No Contact Specified
Permission to Contact	Yes
Emergency/Primary Contact Language Preference	English
Home Care Services	No
Additional Services on Admission	Not Applicable
In the past 12 months, has lack of transportation kept you from medical appointments or from getting medications?	yes
Is Patient Minor?	No
Child Welfare Services Involvement	No
Interpreter used?	Not Needed
Anticipated Discharge Disposition/Needs	Recuperative care
Activities of Daily Living	
Prior to Level of Function	Ambulatory
Assistive Device	walker + post-op shoe, heel weight bearing
Ambulation	Assisted with device
Dressing	Independent
Feeding	Independent
Behavior	Oriented
Communication	Talks;Understands speaking;Understands English
Income Information	
Veterans Affiliation	No
Adjustment to Illness	
Patient's Adjustment	Acceptance
Family's Adjustment	Family not available
Mental Health Assessment	
Hospitalization History	No
Past Mental Health Issues	trauma-related
Mental Status	No issues

Plan/Interventions	Resources given

SW consulted for homelessness and substance use.

Patient is a 54y.o. male admitted on 10/07/2026 for R foot diabetic infection, now s/p partial 5th ray amputation. Patient reports he has been homeless on and off for 6 years, most recently on the street in Westminster for 14 months. Receives mail at General Delivery. Patient reports PTSD from military contractor work overseas; not currently in treatment, open to referral. Reports smoking methamphetamine "a couple times a week", last use 09/28/2026; not interested in residential treatment but accepted outpatient SUD resources. Denies alcohol since August.

SW reviewed insurance (CalOptima Medi-Cal) and offered IF RECUP referral - patient accepted, states "I need somewhere to keep this foot clean." Coastline Home Health accepted for wound care. SW explained that we are not able to guarantee placement at DC, patient understood.

Pending DC orders and recommendations. DCP: Recuperative care with HH wound care.

Addendum:
10:40am: SW provided bus pass and CalOptima BH line number. Patient gave permission to share contact information with Illumination Foundation.

Inpatient History and Physical - Hospital Medicine

Assessment & Plan

- **Diabetic foot infection with osteomyelitis R 5th MT**

DM2 uncontrolled with hyperglycemia
Peripheral neuropathy
Methamphetamine use
PTSD
Homelessness

--- Vancomycin + cefepime + metronidazole IV, f/u bone cx
--- Podiatry consult for I&D vs amputation
--- Basal/bolus insulin, diabetes education, A1c
--- ID consult, SW for dc planning.

Chief complaint

Foot wound

Terrence Banks is a 54 years old male with poorly controlled type 2 diabetes (A1c 11.4) and neuropathy who presents with a draining wound on the outside of his right foot for 3 weeks, worse over the last 4 days with redness up to the ankle and foul odor. He has been living on the street near Little Saigon and walking in ill-fitting shoes. He has not taken insulin in about a month. In our ER, temp 38.2, WBC 17.4, glucose 386, ESR 92, CRP 14.1. X-ray right foot showed cortical erosion of the 5th metatarsal head. MRI confirmed osteomyelitis of the 5th metatarsal head and proximal phalanx without abscess.

Medical/Surgical/Social/Family History

I have reviewed and updated the patient history.

Allergies

Sulfa (Sulfonamide Antibiotics) - Hives

Vitals:

BP	(!) 148/92
Pulse	(!) 104
Resp	18
Temp	(!) 38.2 °C (100.8 °F)
SpO2	98%

Physical Exam

General: Awake, alert, in no apparent distress.
Head: Normocephalic, atraumatic.
Respiratory: Breathing comfortably and in no respiratory distress. No audible wheezing or stridor.
Cardiovascular: Extremities are warm and well perfused.
Neuro: Awake and alert. Moving extremities.
R foot: dressing C/D/I, post-op shoe in place.

Results Review

I have reviewed the latest lab and imaging results.

Required Daily Device Assessment:

This patient does not have a documented central line or urinary catheter.
